PUBLIC COMMENT PERIOD: 30 days from publication date

SUMMARY & DESCRIPTION OF VIOLATION: EPA is providing notice of a proposed administrative order and penalty assessment for alleged violations of the Safe Drinking Water Act ("Act"). EPA is also providing notice of opportunity to comment on the proposed administrative order and penalty assessment.

Part C of the Act specifically mandates regulation of the underground injection of fluids through wells to ensure that the quality of underground sources of drinking water is protected. Section 1422 of the Act requires the EPA to administer UIC programs in states that do not have approved UIC programs. New York has not acquired primacy over the UIC program pursuant to 40 Code of Federal Regulations ("C.F.R.") Part 147 and, therefore, the EPA administers the program in New York.

The Complaint addresses Class V injection wells that are owned/operated by TNP Trucking, Inc. . Pursuant to 40 C.F.R. 40 C.F.R. §144.88(b)(1)(vi) motor vehicle waste disposal wells were required to either be closed or be permitted by no later than January 1, 2008. Respondent

injected waste water from its motor vehicle service and maintenance activities into two unauthorized Class V injection wells.

RELIEF SOUGHT: Respondent shall be ordered to cease injection and submit a complete permit application or approvable closure plan. If a closure plan is submitted, Respondent shall close the well accordingly. In addition EPA is proposing a penalty of **\$8,800.00**.
